

SIFAT...

Sharing God's Love in Practical Ways

Learn skills to impact the lives of the poor around the world:

- Purify water
- Build a latrine
- Teach adults to read
- Make low cost reading glasses
- Practice sustainable agriculture
- Prevent tropical diseases
- Promote Safe Motherhood
- Build simple water pumps
- Combat child malnutrition with leaf protein
- Start a micro-enterprise revolving loan fund
- Raise small animals for protein and income
- Learn how to give vaccinations
- Make a low-cost, sturdy house out of hay
- Teach HIV prevention
- Harness energy from the sun/wind/water
- Build fuel efficient cookstoves
- Preserve foods
- Learn key issues to improve child survival
- Train village health promoters
- Write a project proposal
- Network with development agencies

and much more....

Pregnancy related issues are the top cause of mortality for women of child-bearing age in developing countries.

An environmentally sound solar cooker can also impact a family by allowing daughters to attend school instead of seeking firewood. It is an alternative to smoky fires that cause respiratory ailments.

Join with grass-roots community leaders from around the world to learn practical skills to help the poor help themselves in a context of Christian Community Development. Come to SIFAT's International Training Campus in Lineville, Alabama, Aug. 30—Nov. 5, 2010 for the 10-week Practicum in Appropriate Technologies and Christian Community Development (academic credit/ internships/ scholarship assistance available) For more info call:
